DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on April 6, 2007 has been entered.

2. *Reasons for Allowance*

Claims 6-11 are cancelled.

Claims 1-5, 12, 13-16 and 17-23 are allowed.

Claims 1-5 are allowed for the reason that the prior art does not teach in claimed combination a lighting assembly for a camera positioned adjacent a paper substrate of a printing press comprising: "...camera mounted within said housing; a light source mounted within said housing; and two mirrors positioned within the housing and positioned symmetrically with respect to a plane that is perpendicular to the paper substrate of the printing press to direct light in two distinct paths that remain separate from the same light source to the paper substrate to provide uniform illumination of a portion of the paper substrate using a single light source, wherein light is reflected from that portion of the paper substrate to the camera."

Claims 12 and 13-16 are allowed for the reason that the prior art does not teach in claimed combination a lighting assembly for a camera positioned adjacent a paper substrate of a printing press comprising: "a single strobe light source; and two mirrors positioned adjacent the

same light source, equidistant to a first plane defined by a surface of the paper substrate and symmetrical with respect to a second plane that is perpendicular to the paper substrate and that passes through the single light source without passing through the two mirrors to direct light in two distinct paths of equal length of uniform illumination from the same light source to the paper substrate to provide uniform illumination of a portion of the paper substrate using a single light source, wherein light is then reflected from that portion of the paper substrate to a camera.”

Claims 17-23 are allowed for the reason that the prior art does not teach in claimed combination a lighting assembly for a camera positioned adjacent a paper substrate of a printing press comprising: “... a method for creating dual light paths of uniform illumination directed toward a paper substrate of a printing press, said method comprising:

supplying a single light source; and positioning at least two mirrors adjacent said single light source and symmetrically with respect to a plane that is perpendicular to the paper substrate of the printing press and passes through said single light source, such that the at least two mirrors are positioned on opposite sides of the plane and light from said single light source is split into dual light paths of equal length of uniform, non-collimated illumination and directed toward the substrate by said mirrors to provide uniform illumination of a portion of the paper substrate, wherein light is then reflected from that portion of the paper substrate to a camera.

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
